Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3

1 2 3

4 5 6

7 8 9

Output: Sum of the main diagonal: 15

Sum of the secondary diagonal: 15

Answer

// You are using Java

```
import java.util.*;
```

```
class Suga{
```

```
    public static void main(String[] siva){
```

```
        Scanner s=new Scanner(System.in);
```

```
        int t=s.nextInt();
```

```
        int[][] a=new int[t][t];
```

```
        for(int i=0;i<t;i++){
```

```
            for(int j=0;j<t;j++){
```

```
                a[i][j]=s.nextInt();
```

```
            }
```

```
        }
```

```
        s.close();
```

```
        int s1=0,s2=0;
```

```
        for(int i=0;i<t;i++){
```

```
            for(int j=0;j<t;j++){
```

```
        if(i==j)
            s1+=a[i][j];
    }
}

for(int i=0;i<t;i++)
    s2+=a[i][t-i-1];

System.out.print("Sum of the main diagonal: "+ s1+"\n");
System.out.print("Sum of the Secondary diagonal: "+ s2);

}
}
```

Status : Correct

Marks : 10/10
