## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 12\_Q1

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Sabrina is working on a project that involves analyzing a set of numbers. In her exploration, she encounters scenarios where extracting even numbers and finding their sum is essential.

Create a program that calculates the sum of even numbers from a given array of integers using a lambda expression.

##### ***Input Format***

The first line of input consists of an integer N, representing the size of the array.

The second line consists of N space-separated integers, representing the elements of the array.

##### ***Output Format***

The output prints the sum of the even integers from the array.

Refer to the sample output for formatting specifications.

**Sample Test Case**

Input: 3  
29 37 45

Output: 0

**Answer**

// You are using Java

```
import java.util.*;

class main{
    public static void main(String[] ar){
        Scanner s=new Scanner(System.in);
        int d=s.nextInt();
        int[] a=new int[d];

        for(int i=0;i<d;i++){
            a[i]=s.nextInt();
        }
        int S=Arrays.stream(a).filter(x->x%2==0).sum();
        System.out.print(S);
    }
}
```

**Status : Correct**

**Marks : 10/10**
